

# **EXPRESS** DELIVERY SOLUTIONS

At some point we have all said “How am I going to do *that?*” or “You want *me* to do *what?*”

If *THAT* involves transportation, assembly, kitting, installation, fulfillment or storage – you can now make one phone call, to one company, and Express will deliver your solution.

Express can remove the headaches and costs of owning and running your own warehouse and fulfillment programs.

Many logistics companies will say “We can’t do that,” “It’s not our specialty” or “We don’t have the manpower.” You will never hear that from us.

At Express we use our assets to enhance your core business. You pay for what you use, on an as-needed basis. Why invest in your own warehousing and fulfillment infrastructure when Express can provide it for you.

**“EXPRESS IT – when you think something can’t be done; or when you just don’t want to do it!”**
